

FINALLY!

HIGH QUALITY Long length UHF bulkhead connectors!

Compare:

THEIRS:

Die cast zinc body

4 point ends

Poor plating

Plastic dielectric or (???)

Nickel plated center pin

Undersized body – poor fit
with large chassis nuts

Poorly secured dielectric.
Center dielectric can fall out!

High power melts center
plastic.

OURS:

Solid MACHINED BRASS body!

16 point ends

Flawless nickel plating

DELRIN dielectric!

GOLD plated center pin

Larger body diameter. Excellent fit with large
panel nuts

Firmly secured center dielectric

Better dielectric properties of Delrin means higher
power handling ability
